Experience

Fullstack Developer .Net/C# Junior II

Fitbank

09/2024 – 03/2025 | Fortaleza, Brazil

- **Maintenance, development, and deployment** of software using technologies such as **.Net (6 and 4.5 primarily mostly)**, **.Net Core**, **C#**, **MongoDB**, **SQL Server**, and **RESTful API**, including **JS (JQuery)**, **HTML**, **CSS**, applying **clean code** principles.
- Worked with various project architectures, focusing on **API Rest**, **MVC**, and **Microservices**, not only creating but also improving them.
- Managed **Git/code versioning** with **Azure DevOps**, creating **pull requests**, **merge requests**, and **documentation** for sprint demands.
- Participated in daily meetings where **Scrum agile methodology** was applied.
- Utilized **Amazon monitoring services** such as **Kubernetes** and **ElasticSearch** for application monitoring.
- Conducted **unit testing** and **integration testing**, ensuring the integrity of the application before production deployment.
- Worked with **data manipulation** in **SQL Server** and **MongoDB**, including **creating and updating stored procedures** in SQL Server.

Full Stack Developer .Net/C# Jr

GR Negócios

07/2022 – 09/2024 | Fortaleza, Brasil

I started as a trainee where i spent 7 months and got promoted to Junior. At GR Negócios, i worked on developing and maintaining web applications seeking to correct and improve their capabilities to better attend to the necessity of the company and its customers. The activities englobe the following tools and frameworks:

- Windows Form
- Asp.net framework C# MVC
- JavaScript(JQuery)
- AngularJS
- ORM (Entity Framework, DAPPER)
- HTML, CSS, Bootstrap,Git, Jira, Confluence.
- , SQL Server e MySql.

Projects worked on:

- Charging System WEB - GR Cobrança(A Web application aimed to assist our coworkers to call and charge the people who owe our clients money and make deals for payment with them).
- Password Calling system (Marinha e Capitania dos Portos - CE)
- Credit Analysis System (SICACRED);
- GR Suíte (WEB ERP)
- Web Analysis
- ChatBot WhatsApp fully developed by me that secures deals with the people that have debts with our clients, made entirely in .net core using api rest. All deals made with its respective values would be sent to the GR.Cobranca Application and managed by employees.

Technical I.T Support

GR Negócios

09/2021 – 07/2022 | Fortaleza, Brasil

- Support the realization and implantation of the companys products and services with other companies ERPs.
- Elaborate operational fluxograms
- Adapt existing software to our needs
- Analyse system and programs and seek solutions and improvements.
- Usage of SQL Server as database for the applications which helped me get experience with using it which later helped me greatly as a developer.
